ABOUT ME

Dedicated Computer Engineering undergraduate with a strong background in web development, machine learning, artificial intelligence and data science . Skilled in developing dynamic applications, ensuring software reliability, and exploring intelligent systems for efficiency and innovation. Eager to contribute, learn, and create impactful solutions that enhance user experiences.

EXPERTISE

- **AI & ML** – Data analysis, ML Algorithms, Pandas, Numpy, Scikit-learn
- **Frontend** – HTML, CSS, Tailwind CSS, React.js
- **Backend** – Node.js, Express.js
- **Database** – MySQL, MongoDB, Firebase
- **Programming Languages** – Java, C, C++
- **Project Management** – Agile/Scrum, Jira, Confluence
- **Version Control** – Git/GitHub
- **DevOps and Cloud computing** – CI/CD Pipelines, Docker, AWS

PROJECTS

Personal Budget Tracker (HTML and CSS) 2023

- Developed a responsive web application for budget tracking
- Implemented budget management and expense visualization.

Comprehensive Bookstore Management System (MERN Stack) 2024

- Supports CRUD operations
- updates are managed with MongoDB.
- Technologies: React, Node.js, Express.js, MongoDB

Machine Learning Project: Car Price Prediction 2024

- Developed an ML model to predict Car Price , and provided insights into car valuation , aiding in data-driven decision-making comparing both models.
- Implemented and compared Logistic Regression and Lasso Regression

S2O Management System

2024-2025

(Software Group project, React and Spring boot)

- Software solution for managing the details of S2O Academy.
- Following Agile methodologies for continuous improvement through client collaboration.
- Utilizing Jira for task tracking and Confluence for documentation to ensure project efficiency.

Chat App Mobile Application (Flutter, Firebase)

2024

- Developed a real-time chat app with one to one and group chat functionality.
- Integrated online/offline status indicators and media sharing.
- Optimized Firebase Firestore queries for real-time data updates.

AI Project: Food vision

2025

- Developed an AI model using computer vision to recognize and classify food items using Convolutional Neural Networks (CNN).
- Trained the CNN model on a diverse dataset of food images, enabling accurate classification of different food types .
- Compared model performance, showing that CNN outperforms traditional image classification methods in terms of accuracy and efficiency.

EDUCATION

B.Sc. Eng. In Computer Engineering (3rd Year Undergraduate) University of Ruhuna 2022-Present

G.C.E. A/L Examination- 2020- Ku / AI- Ashraq Maha Vidyalaya, Kurunegala 2007-2020

CERTIFICATE

- "From Zero to Hero in Python" organized by Edvicon International in collaboration with Benzylme Ventures

PERSONAL INFORMATION

- Languages: English, Sinhala, Tamil
